Summary

Software Engineer with hands-on full-stack software development experience. M.Sc. in Software Engineering from FEUP, with a dissertation on ML process improvement using vector databases for similarity search. Proficient in Python, TypeScript, and modern web technologies, with experience developing full-stack applications through industry internships and research projects.

Education

FEUP - Faculty of Engineering of the University of Porto

M.Sc. Software Engineering · Good practices in the SDLC · Final Grade: 17/20

Sep 2024 – Jul 2026

Porto, Portugal

FEUP - Faculty of Engineering of the University of Porto

B.Sc. Informatics and Computing Engineering · Principles in IT · Final Grade: 14/20

Sep 2021 – Jun 2024

Porto, Portugal

Experience

SMARTEX.ai

Machine Learning Intern

Nov 2025 – Jul 2026

Porto, Portugal

- Developed a Scalable Image Similarity Search Tool based on Qdrant for the expansion of the ML dataset, achieving a 13× image volume expansion based on a single query image.
- Implemented an Angular frontend interface, and Python backend code to interact with the data stored in Qdrant, resulting in a sub-5-second response time for 16 million stored data points.
- Deployed the Qdrant and connected it to the existing storage infrastructure.

Sngular

Summer Internship

Jul 2025 – Aug 2025

Porto, Portugal

- Developed a custom filtering interface using React, JavaScript, and Atlassian Forge for the Jira Service Management ecosystem, reducing ticket response times and optimizing workflow efficiency.
- Designed UI components enabling cross-functional teams to quickly filter through multiple complex request types.

INESC TEC

Summer Internship

Jun 2024 – Jul 2024

Porto, Portugal

- Engineered AI-driven building detection models and footprint segmentation pipelines to provide automated, actionable data for critical disaster response initiatives.

Encontro Nacional de Estudantes de Informática (ENEI)

External Relations

Nov 2024 – Apr 2025

Porto, Portugal

- Assisted with sponsorship outreach and secured essential funding.
- Executed ground logistics to ensure the success of the event.
- Collaborated event that brought together over 500 students nationwide.

Awards & Projects

7.1 Tech Hub Hackathon: First Season | Hackathon Winner

Apr 2025

- Joined the winning team out of 6 competing groups.
- Developed “KurzVid”, an innovative short video concept showcasing the most intense moments of films or series, completed in one week.
- Strengthened teamwork and presentation skills throughout the competition.

Skills

Programming Languages JavaScript (TypeScript), Java, C++, Python, PHP

Frameworks & Libraries Vite, React, Next.js, Angular, Laravel, TailwindCSS, Bootstrap

Databases Firebase, PostgreSQL, Qdrant

Tools Figma, GIMP, Krita, Git, GitLab, GitHub

Methodologies Agile (Scrum, Kanban)

Human Languages Portuguese (Native), English (C1), French (A1), German (A1)

Hobbies

Guitar Classic and Electric; guitarist with 8+ years' experience; performed in 5 concerts.

Music Keen interest in classical, rock, and (progressive and melodic) metal music.
